## Divine Divisors

### ✚ Problem Description

Given a number 'n' , find all the possible divisors and print them in increasing order.

### ✚ Constraints

1 <= T <= 15.

1 <= N <= 10^15.

### ✚ Input Format

First line contains a single integer T denoting the number of test cases.

Each test case consists of a line containing an integer N.

### ✚ Output

For each test case print a line containing all the divisors in increasing order separated by space.
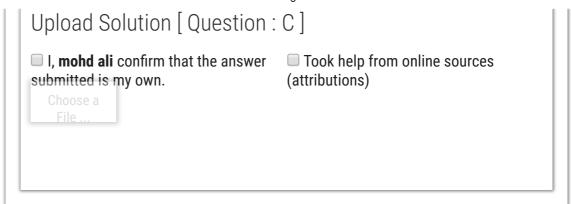

### ✚ Test Case

### ✚ Explanation

Example 1

Input

1

10

Output

1 2 5 10
